

Introduction

Frigofilt filter driers with replaceable solid core, type HFF , are for use in liquid and/or suction lines in refrigeration, freezing and air-conditioning systems.

These filter driers are able to meet very demanding requirements.

The new high working pressure filters offers flexibility when operating with R 410 A and CO2.

The customersn can choose between two versions, a normal and a high pressure version.

Description

- HFF housings (including core holder) are made entirely of steel are compatible with all refrigerants.
- HFF housing are made with copper solder connectors, except the high pressure version, they have steel solder connectors

- HFF housings have undergone anti-corrosive washing and have a corrosion-resistant powder-paint finish.
- HFF housings are pressure control tested in hot water with nitrogen .

Top covers for HFF housings:

- Zinc-chromated steel top covers with external access connection (1/4" NPT)

Inserts for HFF housings -solid cores

- HFF filters are useable with all available solid cores
